

# Badgers

## Print and Play instructions

- All prints are designed for printing on A4 paper
- Settings are 300 dpi and printing without margins

### Badger cards (63x88mm)

- On the Badger cards the backs of cards are really important and must match the right fronts so these are ment to be cut out in pairs (Front + Back alongside) and either folded before placing in a sleeve or glued.

### Forest cards (88x126mm)

- Fronts and backs can be combined either way so these cards can be:
  - Printed double-sided and then cut
  - Printed single-sided and either glued or placed in a sleeve

### The Box (Printed on B3 Paper)

This is not needed for your game but if you wish to make it we have attached a folding and cutting diagram.
